25X1X

15 October 1948

2. A large airfield was located near SLUTSK. Formations of 27 planes each were observed landing at the field.
3. A large fuel dump guarded by air force soldiers was at the field. The containers were dug into the ground and protected by slanting roofs so that they looked like wooden cantonment buildings.

25X1A [REDACTED] Comment:

Two improvised airfields have been known to be near SLUTSK.

As this report does not contain accurate data on the location of the field observed, it is not clear which of the two fields is concerned. From the observed formations of 27 planes it cannot be inferred what type of aircraft are stationed there.
